

# Making phones more useful

At Shockoe, we know that jobs come in many shapes and sizes: Managing a warehouse? Shopping for groceries? On-the-clock or not, work is work. That's why we build apps that make work easier — so that people have more time for the things they care about.

## Our Services

IT Strategy

Behind every great app stand robust analytics and a concrete mobile strategy. We work knowing there is no substitute.

Development

iOS, Android, Flutter, React Native, AWS, Oracle, and Axway to name a few - no matter what you need, we're ready.

UX / UI Design

Without it, even the best ideas lose all traction. Our talented designers ensure your application gets the engagement it deserves.

## Who is Shockoe?

We're a team of entrepreneurs, former corporate types, unruly designers, and manic developers who share a passion: to make beautiful and useful apps with great technology.

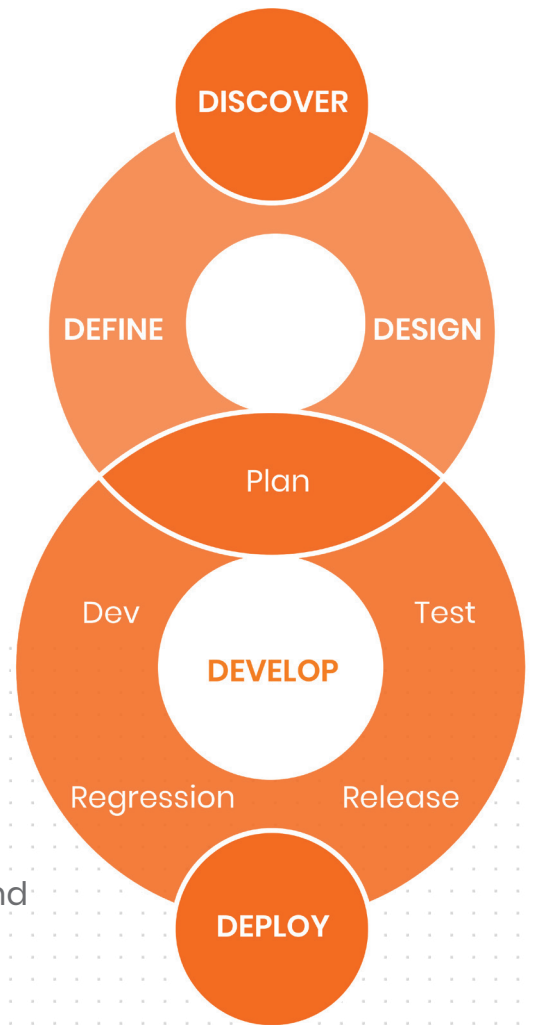

# A process that delivers

Every app is unique, but our process, on the other hand, is tried and true. Our iterative process ensures we work closely and openly with our clients to deploy and deliver projects that exceed expectations.

## Toolbox

It takes the right tools and the right people to deliver great applications. Shockoe employs cutting edge technology and people from just about every diverse background. There's no problem we can't tackle.

## Our Partners

## Our People

Designers, developers, strategists, creatives, and engineers – it takes a village to make an app – and Shockoe has one.
