

Healthcare's HIPAA Compliant Event Calendar & Registration Solution

Create, publish, promote and track events and classes effectively all in one place—**without worry**.

Trumba allows healthcare organizations to effectively and affordably improve engagement and attendance, streamline registration and ensure protected health information is secure.

Calendar Publishing

- Unlimited branded web calendars
- Class Directories
- CMS integrations

Secure Event Registration & Management

- HIPAA-compliant with BAA
- Custom registration forms
- Payment collection
- Attendance tracking

Communication

- Email invitations and subscriptions
- Automated reminders and change notices
- Maintain engagement with post-event emails

Akron Children's is the ninth largest independent pediatric hospital system in the country. But we were using a homegrown system for events. It was functional but cumbersome.

Now with Trumba, it literally takes seconds to go through calendar invites and approve them. **The workflow's so much faster.**

It's like Trumba's thought of everything you'd want in a calendar.

Akron Children's Hospital

Publish interactive healthcare event and class calendars your audience will love.

It's great when clients tell us they get better results using less resources. **You'll love how Trumba helps you achieve more with less.**

Trumba answers the need for—

- More brand-flexible and scalable solution
- More secure HIPAA-compliant technology
- More responsive and dedicated support staff

- Less costly implementation
- Less interdepartmental frustration
- Less effort spent on time-consuming tasks

In fact, in a recent survey, **95% of Trumba clients** reported they would definitely or likely recommend Trumba to others.

So go ahead. Visit trumba.com to learn more. **Sign up for a demo or free trial today.**

I cannot say enough good things about Trumba!

Trumba has helped us our large organization be more efficient managing classes and events.

They helped us tremendously during the pandemic when a quick solution was needed.
